

KRAA Nacer *Java / Spring Boot Backend Developer*

nacer.kraa@gmail.com | +213 558 95 10 32

Ouled Hamla, Oum El bouaghi, Algeria | LinkedIn | Portofolio

SUMMARY

Software Engineer with a Master's degree in Software Engineering and experience developing backend applications and RESTful APIs using Java, Spring Boot, and modern software engineering practices. Experienced in designing scalable backend systems, database modeling, authentication and authorization mechanisms, API integration, and application architecture. Familiar with containerized environments, relational databases, and enterprise software development. Passionate about building reliable and maintainable backend services, solving complex business problems, and continuously improving software quality and performance.

PROFESSIONAL EXPERIENCE

05/2024 – 05/2025

Remote

SIGEAD

Full Stack Web Developer

- Designed and developed RESTful APIs for business applications.
- Implemented authentication and authorization mechanisms.
- Designed relational database schemas and optimized SQL queries.
- Developed backend business logic and data processing workflows.
- Integrated frontend and backend systems through REST APIs.
- Participated in software architecture decisions and performance optimization.
- Maintained application reliability, security, and data integrity.

10/2024 – 04/2025

Remote

Go Platform

Backend Web Developer

- Developed and maintained backend services and RESTful APIs.
- Implemented business logic supporting core application workflows.
- Designed and optimized relational database structures and queries.
- Collaborated with frontend developers to deliver integrated solutions.
- Participated in debugging, testing, and system maintenance activities.
- Contributed to improving application stability and performance.

PROJETS

Asset Management Platform

SEGIAD

- Developed a full-stack enterprise application using Spring Boot and Angular.
- Designed and implemented RESTful APIs.
- Managed database schema evolution using Liquibase.
- Implemented authentication and role-based authorization.
- Used PostgreSQL, Docker, and Git for development and deployment.
- Worked with JHipster architecture and code generation tools.

EDUCATION

2021 – 2023 Constantine, Algeria	Master's Degree in Software Engineering <i>Abdelhamid Mehri University – Constantine 2</i> • Master's Thesis: Design of an Enhanced Evolutionary Algorithm for Distributed Localization in Wireless Sensor Networks
2018 – 2021 Constantine, Algérie	Licence en génie logiciel <i>Abdelhamid Mehri University – Constantine 2</i> • Final Year Project: Design and Development of a Web-Based Management System for Learners and Training Institutions

TECHNICAL SKILLS

Languages: • Java, SQL, JavaScript, TypeScript	Backend: • Spring Boot, Spring Data JPA, Spring Security, REST APIs, Hibernate	Databases: • PostgreSQL, MySQL, H2
Architecture: • Microservices, Layered Architecture, API Design	DevOps: • Kubernetes, Docker, Git, Linux,	Frontend: • Angular, HTML, CSS

LANGUAGES

Arabic • Native	French • Good
English • Good
